

SUMMARY

I am a Front-End Developer and Test Automation Engineer with expertise in React.js, Next.js, and automation testing. I have optimized UI designs, integrated seamless API functionality, and implemented Cypress-based test automation to enhance system reliability. With experience in Agile Scrum practices and Docker deployment, I streamline development workflows while ensuring high-quality software through QA testing and code reviews.

SKILLS

- React.js
- Next.js
- JavaScript
- TypeScript
- Cypress
- Selenium WebDriver
- Java
- Postman
- REST API Testing
- Docker
- CI/CD
- Jenkins
- Agile Scrum
- UI/UX Design
- Test Automation
- Quality Assurance
- Git/GitHub
- JMeter
- API Integration
- Code Review
- Technical mentorship
- Problem solving
- Team collaboration
- System maintenance

EXPERIENCE

Front End Developer and Test Automation Engineer / Five Jars - Brooklyn, NY

08/2021 - Current

I am a Front-End Developer and Test Automation Engineer skilled in React.js, Next.js, Cypress, and Docker, optimizing UI, automation, and deployment.

- Revamped the UI with React.js and Next.js to enhance user experience and modernize design.
- Developed and optimized API integration for seamless front-end and back-end functionality.
- Designed and implemented automated testing frameworks with Cypress, reducing manual effort.
- Led Agile Scrum practices, including sprint planning and technical review sessions.
- Integrated Docker for deployment, streamlining the CI/CD pipeline.
- Conducted quality assurance testing, including code reviews and bug fixes, to ensure stability.
- Provided mentorship and knowledge-sharing sessions to enhance team collaboration.

Quality Test Automation Engineer / White label ecommerce

08/2019 - 08/2021

- Designed and implemented automated test scripts with Selenium WebDriver and Java.
- Conducted regression testing to maintain platform stability across multiple updates.
- Developed comprehensive test plans and strategies to align with project requirements.
- Automated API testing with Postman, improving backend validation processes.
- Collaborated with developers to troubleshoot and resolve defects efficiently.
- Implemented CI/CD integration using Jenkins for automated test execution.
- Performed performance testing with JMeter to assess system scalability.

TRAINING AND SKILL DEVELOPMENT

- 2 days, Project Management Training, successfully completed training focused on implementing effective Agile Scrum methodologies for project execution and delivery.
- 2 days, Team Building Activities, trained to foster collaboration, enhance team dynamics, and resolve conflicts in day-to-day project work.
- 2 months, TypeScript Training, Ongoing training in scalable and maintainable development practices using TypeScript.
- 3 days, Microservice-Based Architecture, Gained hands-on exposure to modular and distributed application design.
- 1 day, Docker Training, Practical exposure to containerization, deployment processes, and DevOps best practices.
- 2 days, AWS Crash Course, Acquired foundational knowledge and exposure to AWS services and cloud-based deployments.
- 1 day, Cloud Deployment, successfully deployed Node.js-based applications in cloud environments, gaining practical experience.
- 1 day, Jenkins CI/CD Pipelines, Completed a crash course on automated build and deployment workflows.
- 5 days, Cypress Automation, Gained expertise in GUI and backend test automation frameworks.
- 3 days, Test Automation Frameworks, Trained in tools like Postman for API testing and MongoDB for database querying.
- 3 days, AI Training, learned to leverage AI tools for debugging, troubleshooting, idea generation, and document processing to enhance efficiency.
- Project Achievement, successfully completed a project and received a team reward for outstanding contributions and timely delivery.
- 2 days, Offshore and Onshore Team Building, Conducted and participated in training to improve collaboration and productivity across teams.
- Ongoing, Learning and Development, Regular engagement in initiatives to stay updated with the latest trends in technology and project management.
